Fall Semester 2005
David Haines
Quiz #29
November 10

Let $\mathbf{f} : R \subset \mathfrak{R}^2 \rightarrow \mathfrak{R}^3$ be defined by $\mathbf{f}(s, t) = (s, t, 2s - 1)$ with $R = [0, 1] \times [0, 2]$.

Let M be the smooth surface parametrized by \mathbf{f} .

Let $g : \mathfrak{R}^3 \rightarrow \mathfrak{R}$ be a scalar-valued function with $g(x, y, z) = x^2 + y^2 + z^2$.

Calculate the value of the surface integral $\iint_M g d\sigma$.
