Grading: Homework - 30%; 2 mid-terms @20% each; Final Exam - 30%

Prerequisites: Math 206

This is an introduction to complex analysis. We study functions of a complex variable. We discuss notions such as *limits*, *differentiability* and *integrability* (as in first year calculus) for such functions. We plan to cover most of Ch.1 - Ch.7 of the text. If time permits, we discuss parts of Ch. 8,9,10.

Note on exams:

All exams will be take home and they will be handed out one week before due date. The due dates for the exams are (1) Exam I - due February 6; (2) Exam II - due March 19; and (3) Final Exam - due 10:30am Thursday April 10. Under **NO** circumstances are you allowed to discuss the exam problems with anyone else BUT me. Collaboration, in any form, with other classmates on any exam problem is prohibited. I TAKE THIS VERY SERIOUSLY.

Homework problems from the text will be assigned frequently and reading assignment will be given at the end of every lecture. Be sure to read ahead of time before coming to the next class. I will collect the homework on the indicated due dates. Since I will assign many problems, I will select a few to grade. **Late homework may NOT receive any credit.**
